

The Miquon School

Miquon Matters, 2.20.19

Last week we said a fond (albeit tearful) farewell to third and four grade teacher Sam Herron, who had been with us since last spring, first as a Swarthmore student teacher and then as a maternity leave substitute for Rachel Elin-Saintine, who returns from leave today! From the looks on our faces, you can see how we all feel about Sam!

Your Action Items

1. Always check the calendar! There's a Game Night and Coffee with Susannah, both coming up soon!

[Calendar](#)

2. Weather permitting, there's a board meeting this evening at 7:00 in Louis and

Jeri's room. All parents are invited--come check it out!

Agenda

3. Several recent After Care bills, held during Katie Rosenberg's maternity leave, were recently sent all at once. Please contact the Business Office if you need extensions on payments.

Last week, we all counted to 100 to honor 100 Days of School by doing 10 sets of activities 10 times each--walking through 10 hoops, hopping over 10 "stones," squatting and quacking like a duck 10 times, and more. It was a great way for all children to honor the day and better understand the concept of 100!

Gamewright Game Night on Feb 24

Do you like playing games? Join us for an afternoon of games on Sun, Feb 24 from 2:00 - 4:00 pm in the Library! Whether you are a beginner or an expert, expect to have a great time and learn some new card and board games!

Gamewright, the makers of popular family games, will provide games for us to play and try out. If you decide you like any of their games, they will be available

for sale after the event with some of the proceeds going to the Miquon Annual Giving Campaign.

That said, no purchases are expected--just come and play games and have fun! We love this event because playing games is such a great way to practice important math concepts and skills. For more, check out [information from TERC Investigations](#), the backbone of our mathematics curriculum for Grades 1-5.

RSVP to Marea Palmer-Loh by emailing mareapl@miquon.org.

Children in first and second grade created submissions to The Barnes Foundation's Art of Math challenge, an offering for school students to use mathematical strategies to design and build a 3-D model of one of three selected paintings. Above, check out the scale model of The Raft, by William James Glackens, created by Marea and Sara's group.
