

# Metis Schedule

*Updated November 2021*

The Miquon Library uses the Metis classification system instead of the Dewey Decimal System. Metis is a flexible, intuitive and child-friendly system of library categorization. It uses whole language, visual cues, and logic that reflects children's own experiences. It puts the child in the center of their own search.

The first versions of Metis were created by school librarians at The Ethical Culture School in 2011. Miquon's version of Metis is based on these classifications but varies somewhat.
